+91 76800 05486

Professional Summary

B.Tech graduate with hands-on experience in Python, SQL, data analysis, ETL, and data visualization. Skilled in cleaning, transforming, and analyzing data to uncover trends and deliver actionable business insights. Experienced in building data pipelines and creating clear, business-focused dashboards using Power BI and Tableau. Strong analytical thinking with a practical approach to solving data-driven problems.

Education

Sri Indu College of Engineering and Technology — Hyderabad, TG

Bachelor of Technology in Data Science — *Aug 2022 – July 2026*

Technical Skills

Languages: Python, SQL
Data Analysis: Pandas, NumPy, Exploratory Data Analysis, Data Cleaning, Feature Engineering
Data Visualization: Power BI, Tableau, Excel, Matplotlib, Seaborn, Plotly, Dashboard Development, KPI Development, Data Storytelling
Statistics: A/B Testing, Hypothesis Testing, Statistical Significance, Confidence Intervals, Conversion Rate Analysis
Machine Learning: Scikit-learn, Classification, Anomaly Detection, Fraud Detection, Risk Scoring
Data Engineering: ETL, Data Transformation, Data Modeling, SQL Data Pipelines
Databases & Tools: MySQL, PostgreSQL, Git, GitHub, VS Code, Streamlit

Experience

Codtech IT Solutions — Hyderabad, TG

Data Science Intern — *May 2024 – June 2024*

- Performed data preprocessing, cleaning, exploratory data analysis, and visualization using Python, Pandas, and NumPy.
- Analyzed datasets to identify patterns and trends, validate findings, and translate results into actionable analytical insights.
- Applied machine learning techniques and developed visual reports to communicate analytical findings.

Projects

E-Commerce Business Intelligence & Customer Analytics

Python, SQL, Power BI, Pandas, MySQL — *August 2026*

- Analyzed e-commerce transaction data across revenue, customer behavior, product performance, and market trends using Python and SQL.
- Performed data cleaning, feature engineering, EDA, and RFM segmentation to identify VIP, loyal, and high-value customer groups.
- Built Power BI dashboards for executive KPIs, customer segmentation, product performance, and market insights; identified peak sales periods, leading markets, and revenue-driving products.

Marketing Campaign A/B Testing Analytics

Python, Statistics, Streamlit, Plotly, SciPy, Statsmodels — *June 2026*

- Built an interactive experimentation platform to evaluate control vs. treatment conversion performance and quantify campaign lift.
- Applied two-proportion z-tests, confidence intervals, absolute/relative lift, and statistical significance to support experiment decisions.
- Added sample-size estimation, customer segmentation, cumulative trends, and downloadable analysis outputs for experimentation workflows.

Fintech Fraud Detection & Transaction Monitoring

Python, Pandas, SQL, Scikit-learn, Streamlit — *April 2026*

- Built a fraud-monitoring system combining rule-based detection, supervised classification, and unsupervised anomaly detection.
- Developed a hybrid risk-scoring framework combining ML fraud probability, anomaly risk, and rule-based signals to classify transactions into low-, medium-, and high-risk bands.
- Implemented SQL-backed monitoring and an interactive Streamlit dashboard for fraud trends, transaction success rates, risk distribution, and high-risk alerts.

FMCG Supply Chain & OTIF Analytics

Power BI, SQL, Data Modeling, Supply Chain Analytics — *Jan 2026*

- Analyzed customer order-fulfillment performance to identify service-level gaps affecting delivery performance and expansion readiness.
- Developed On-Time, In-Full, and OTIF KPIs to evaluate customer service levels and identify delayed and underperforming accounts.
- Built an interactive Power BI dashboard that highlighted fulfillment gaps, delayed customers, and persistent service-level underperformance.

HR Workforce & Employee Retention Analytics

Tableau, Excel/CSV, Data Cleaning, Data Visualization — *Dec 2025*

- Analyzed employee attrition across department, gender, age, and job satisfaction to identify workforce turnover patterns.
- Developed KPI-driven Tableau dashboards tracking attrition rate, employee count, average age, and job-satisfaction trends.
- Added interactive filters and drill-down analysis to help users explore workforce turnover and identify retention opportunities.

Certifications & Training

- **Data Analyst 101** — Microsoft
- **Business Analytics with Excel** — Microsoft
